

I work as a postdoctoral researcher in the Medical Decision Making group (department of Public Health, Erasmus University Medical Center Rotterdam). I have a background in Health Sciences (BSc) and Clinical Epidemiology (MSc). I conducted my PhD thesis at the department of Public Health with the title: *Design and analysis of randomized and non-randomized studies: improving validity and reliability*. My main research interests are: (methods for) causal inference in observational data, measuring quality of care and the evaluation of value-based healthcare.
