

Dr. Jacob Visser is trained as a musculoskeletal radiologist, clinical epidemiologist and health economist. He currently works clinically at Erasmus MC in Rotterdam in the Radiology & Nuclear Medicine department and also manages the IT unit of this department. He leads research in the field of value-based imaging and is appointed as assistant professor. In addition, he is the Chief Medical Information Officer of the Erasmus MC and involved in multiple digital health innovations. Furthermore, he was and is involved in several national and international organizations within radiology. He is a member of the Value-based Radiology Subcommittee of the European Society of Radiology (ESR) and of the Steering Committee on Common Data Elements, the latter being a joint initiative of the American College of Radiology and the Radiological Society of North America (RSNA). In addition, he has just completed the term of office within the Quality Committee of the Dutch Society for Radiology and is a former member of the eHealth and Informatics Subcommittee of the ESR and the Template Library Advisory Panel (joint initiative of the ESR and RSNA).
